

ROOFING & SOLAR NEWS

WHAT TO KNOW ABOUT SOLAR

PANELS

LG320 PANEL OR BETTER

All panels are subjected to rigorous quality control, comes with an enhanced performance warranty, even after 25 years the cell guarantees 1.2p more output than previous models. LG NeON 2 is the “Cadillac” of all solar systems.

MICRO INVERTERS

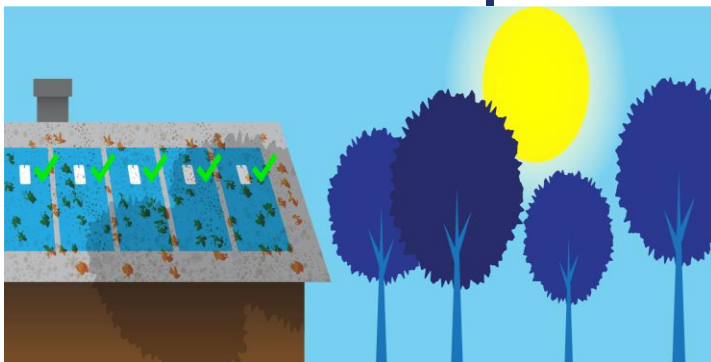

ENPHASE IQ6 or IQ7

Each Enphase Microinverter maximizes energy production and individually connects to each PV module in your array. If one panel goes down you don't lose the entire system, just the panel until its repaired or replaced. Most other systems have 1 microinverter so if a panel goes down so does the entire system.

MONITORING

ENPHASE ENERGY

We will receive reports each month on your systems production and will be able to see if any problems arise that need to be addressed to ensure you have the system you are promised. You will also have access to view your system's output anytime you like which is a feature our clients love.

BEST QUALITY & BEST VALUE

Here at Christian Roofing, Inc., we only use the top of the line solar products to ensure our clients are getting the best bang for their buck. We are here to help you save and are not going to rip you off in the process.

What is solar power?

Solar power is the conversion of sunlight into electricity, either directly using photovoltaics (PV), or indirectly using concentrated solar power (CSP). Concentrated solar power systems use lenses or mirrors and tracking systems to focus a large area of sunlight into a small beam.
